

Technology Platform Smart Grids Austria

www.smartgrids.at

■ Technology Platform Smart Grids Austria

The Technology Platform Austria ...

- connects sectors
- promotes innovation
- has a systemic approach towards the energy industry
- fosters Austria as an innovation and business location
- is technologically and vendor-neutral
- acts politically independent

Platform members

- Technology suppliers
- Energy industry
- Regulator
- R&D

*The **Technology Platform Smart Grids Austria** has become a competent and valuable partner for ministries, public authorities and international experts over the last few years.*

■ External activities

National activities

Participation in **consultational processes**

- Integrated Energy and Climate Strategy of the Austrian Government
- Energiedialog 2050 of the Ministry for Transport, Innovation & Technology (bmvit)

Policy papers of the technology platform

- 01/2016 „Model region energy“
- 01/2017 „Electric mobility in Austria“
- tba „Battery storage in distribution grids“

Fact sheets of the platform

- 01/2017 „Network and Information Systems Directive“
- 01/2017 „Data Protection Regulation“
- 02/2017 „Smart Meter & Smart Metering“

Participation in **strategy processes**

- Strategy process Smart Grids 2.0 (bmvit)
- Storage initiative (Klima- und Energiefonds)

International activities

Conference contributions

- Smart Grids Week 2013-2016
- Smart Energy Systems Week 2017

Member of **ETIP SNET** (European Technology and Innovation Platform Smart Networks for Energy Transition)

- Participant at National Stakeholder Group

Exchange with **international projects**

- E.g. SINTEG projects Germany

■ Projects of the Technology Platform

Technology Roadmap Smart Grids Austria

- Technologies and implementation steps towards a Smart Grid in Austria
→ [Download](#) the English version

Initiative for Developing an Austrian Smart Grid Reference Architecture (RASSA)

- Definition of a Smart Grid Reference Architecture for Austria based on international standards
→ [Project Homepage](#)

Interoperability in the Energy System

- Development of processes to ensure interoperability in the energy sector
→ [Project Homepage](#)

Smart Grid Projects in Austria
